CLAIM LISTING

1. (Currently amended) A device for monitoring molecular contamination, said device comprising:

a measurement element comprising a material having a surface area greater than 100 square meters per gram, said measurement element not coated with an odorant molecule attachment material; and

a sensing circuit connected to said measurement element and providing an output signal characteristic of molecular contamination on the surface of said material.

- 2. (Original) The device of claim 1 wherein said material comprises an aerogel.
 - 3. (Withdrawn) The device of claim 1 wherein said material comprises carbon.
- 4. (Withdrawn) The device of claim 1 wherein said material comprises activated carbon.
- 5. (Withdrawn) The device of claim 1 wherein said material comprises a polymer based on diphenyl p-phenylene oxide.
 - 6. (Withdrawn) The device of claim 1 wherein said material comprises silica.
- 7. (Withdrawn) The device of claim 1 wherein said material comprises a resorcinol-formaldehyde organic polymer.
 - 8. (Withdrawn) The device of claim 1 wherein said material comprises alumina.
- 9. (Withdrawn) The device of claim 1 wherein said material comprises a nanocellular carbon foam.
- 10. (Original) The device of claim 1 wherein said material is more than 1 nm thick.
- 11. (Original) The device of claim 1 wherein said material is less than 100 microns thick.
- 12. (Original) The device of claim 1 wherein said material has a surface area concentration above 400 m²/g.
- 13. (Original) The device of claim 1 wherein said material has a surface area concentration above 1000 m²/g.

- 14. (Original) The device of claim 1 wherein said material has a surface area concentration above 1500 m²/g.
- 15. (Original) The device of claim 1 wherein said measurement element includes a piezoelectric crystal having a detecting surface and said material is formed on said detecting surface.
- 16. (Original) The device of claim 15 wherein said sensing circuit comprises a surface wave acoustic (SAW) sensor circuit.
- 17. (Withdrawn) The device of claim 1 wherein said sensing circuit comprises a quartz crystal microbalance (QCM) sensor circuit.
- 18. (Withdrawn) The device of claim 1 further comprising a chemically selective membrane located between a source of said molecular contaminant and said material.
 - 19. (Withdrawn) The device of claim 1 wherein said material is doped material.
- 20. (Withdrawn) The device of claim 19 wherein said material is doped with a specific molecule which interacts with a particular contaminant molecule.
- 21. (Withdrawn) The device of claim 19 wherein said material is doped aerogel material.
- 22. (Currently amended) A method of monitoring molecular contamination, said method comprising:

providing a measurement element comprising a material having a surface area greater than 100 square meters per gram, said measurement element not coated with an odorant molecule attachment material;

collecting molecular contamination on said surface area; and electronically detecting said molecular contamination.

- 23. (Withdrawn) A method as in claim 22 wherein said electronically detecting comprises exciting an acoustic wave in said measurement element.
- 24. (Original) A method for monitoring molecular contamination, the method comprising:

providing a piezoelectric sensor;

locating a high-surface-area measurement element on said piezoelectric sensor;

and

detecting a molecular contaminant on said measurement element.

- 25. (Original) The method of claim 24 wherein said detecting comprises generating an electrical signal indicative of an accumulated quantity of said received molecular contaminant on said measurement element.
- 26. (Withdrawn) The method of claim 25 wherein said detecting comprises exciting an acoustic wave in said piezoelectric sensor.
- 27. (Original) The method of claim 25 wherein said detecting comprises exciting an acoustic wave on the surface of said piezoelectric sensor.
- 28. (Withdrawn) The method of claim 25 further comprising inhibiting contaminants other than a selected molecular contaminant from reaching said measurement element.
